A MESSAGE FROM THE SUPERINTENDENT OF PUBLIC INSTRUCTION

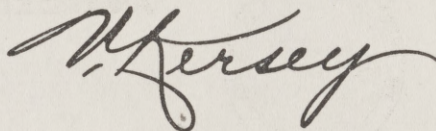

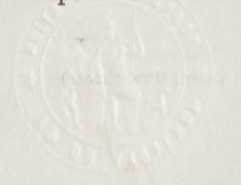

The path of your school experience is marked by certain milestones. This diploma of graduation is a milestone for you and points the way to other educational opportunities ahead.

It is our hope that you will go joyfully and confidently into the future because of your elementary school experience.

The education that is real is the education that means one has a finer character because of it. The public school has given you the opportunity to develop your character, your abilities, and the gifts you have, so that you may serve society and be a happy individual.

It is within your power to make the world a happier and more beautiful place for all people. The world needs you and your gifts.

Graduation is our way of saying two things to you, "Well done" and "Go forward." America has faith and hope in the future because of you.
